

Service

Solutions

Satisfaction

If You Manage Buildings.....we can help you answer questions.....as we have done for others

Are these your questions?

Imagine answers a click away.

1. What Do We Own?

2. What Is Our Condition

3. What Are Our Needs?

4. What Is Our Funding Need?

1. What Do We Own?

Through our data collection process we assemble the information required to answer your questions.

2. What Is Our Condition?

Using your criteria, we develop a comprehensive view of the portfolio, buildings and component value to your business effectiveness.

3. What Are Our Needs?

We work with you to understand what you need to provide to maintain what you currently and what your future needs to perform at an expected level of service.

4. What Is Our Funding Need?

We put values in real financial terms answer when and how much funding will be required for your built assets to be satisfactory assets to your business process.

People

We have the expertise.....to provide the guidance delivering.....a tool to help you do your job

President

Robert S. Michaud, P.E., a Mechanical Engineer from Clarkson University who holds Professional Engineering licenses in Maine, Vermont and Florida. He has been involved in industrial and commercial mechanical project engineering and management since 1990. Michaud Engineering has extensive experience in:

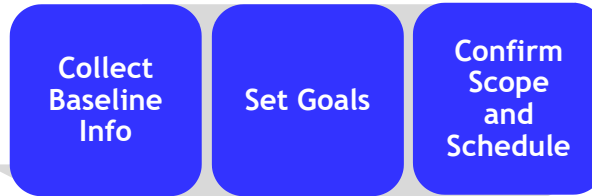

in:

- Operations and maintenance of building systems
- Engineering, project management, maintenance and capital projects for industrial clients including pharmaceutical manufacturing, pulp and paper
- Developing and implementing CMMS systems including Datastream's MP2, Maximo, and Corrigo.
- Building and equipment inspection and assessment for repair, maintenance and capital expenditures

At Michaud Engineering we work in cooperation with many companies to provide the right service, solution and satisfaction. We can bring one of our partners or work with a firm or software already providing part of the service.

Process

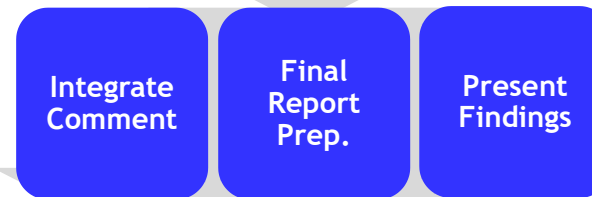

We learn why and how you do business
